

Type variants with no home in Figma

VARIANTS DECLARED	OFF-SPEC	OFF-SPEC CALL SITES	FROM ONE WEIGHT LINE
73	18 in 15 rows	158 / 1072	120 call sites

One drift affects whole families, so it is not listed row by row.

Figma sets Paragraph 02 at 14.22px; the theme sets 0.831rem = 13.30px. Figma sets Caption at 12.64px; the theme sets 0.75rem = 12px. Every paragraph2* and caption* variant inherits that gap, including the ones whose weight is correct.

Weight, family or case Figma never published

9 variants · 38 uses

The size and role exist in the design system, but not in this cut. Open Sans stops at SemiBold in the published styles, there is no uppercase Regular, and the caption face is split the opposite way round from the code.

h5Regular

6
USES

Regular weight at the H5 size. Heading/05 is published SemiBold only.

FIND IT AT

www.safestays.com/search

Open the hotel filters and follow the GSA rates link — the modal body is set in it. Also the Extend Stay hotel list on a stay page, and the maintenance screen.

Your stay at Harbour View Inn

IN CODE

Open Sans 400 · 20.26px

FIGMA · HEADING/05

Open Sans 600 · 20.25px

Your stay at Harbour View Inn

Open Sans · 400 · 20.256px / 24.608px.

linksRegular

4
USES

Underlined Open Sans Regular. Both link styles Figma ships, Paragraph 01/Links and Paragraph 02/Links, are SemiBold.

FIND IT AT

www.safestays.com/auth/login

The two links under the sign-in form: Help with sign in, Book a demo.

Open Sans 600 underline · 16px

View cancellation policy.

Open Sans · 400 · 16px / 22px · underlined.

paragraph2RegularUppercase

5
USES

Uppercase at Regular weight. Figma only publishes Uppercase-Semibold, at P1 and P2, so uppercase always carries weight in the design system.

FIND IT AT

www.safestays.com/stay/{stayId}

Action labels in the message log, and the ALIAS APPROVED tag on similar-hotel cards in the booking modal.

CHECK-IN FROM 3:00 PM

13.30px

FIGMA · P2/UPPERCASE-SEMIBOLD

Open Sans **600** uppercase ·
14.22px

CHECK-IN FROM 3:00 PM

Open Sans · 400 · 13.296px / 18px.

paragraph2Bold

3
USES

Weight 700. Every Open Sans style in the published set is Regular or SemiBold.

FIND IT AT

www.safestays.com/tasks/open-tasks

The jump-to-section sidebar on the tasks list, and replies inside a message thread.

Total due today · £248.00

IN CODE

Open Sans **700** · 13.30px

FIGMA

No Open Sans 700 published

Total due today

Open Sans · 700 · 13.296px / 18px.

paragraph2RegularLightBoldGray

1
USES

Weight 700, and the name is wrong twice over: it spreads paragraph1Base, so it renders at 16px, not P2, and it is bold rather than regular.

FIND IT AT

www.safestays.com/stay/{stayId}

The opening message of an issue thread in the message log.

Total due today · £248.00

IN CODE

Open Sans **700** · **16px** (named "paragraph2")

FIGMA

No Open Sans 700 published

Total due today

Open Sans · 700 · 16px / 22px · #49577A. Note the size: 16px, not the 13.296px its name implies.

captionBold

3
USES

Weight 700 at caption size. The three published captions are Open Sans Regular, Open Sans Regular (gray) and Inter SemiBold.

FIND IT AT

www.safestays.com/stay/{stayId}

The delete-message confirmation inside a message thread.

Non-refundable after 48 hours

FIGMA

No Open Sans 700 caption published

Non-refundable after 48 hours

Open Sans · 700 · 12px / 15.008px.

stat

12

USES

Weight 700. The design system publishes Montserrat at 400 and 600 only, and the Stat # row of the spec table asks for Semibold. Counts statGray and statWhite, which are colour twins.

FIND IT AT

www.safestays.com/billing-center/invoices

The big figures on the billing summary cards. Also the agency dashboard stat rows and donut chart centre.

1,324

IN CODE

Montserrat **700** · 32.43px

FIGMA · STAT

Montserrat **600** · 32.44px

1,324

Montserrat · 700 · 32.432px / 39.408px.

captionSemiBoldInter

3
USES

Inter. The design system publishes two families, Montserrat and Open Sans — Inter is in neither list, and the spec table sets Caption-Semibold in Open Sans. Counts captionSemiBoldInterBlue, a colour twin.

FIND IT AT

www.safestays.com/

Stay IDs in the Needs Attention panel rows on the home page. Also the issues drawer and the watch-stay avatar row.

9DX8-3QT5-7WY3

IN CODE

Inter 600 · 12px

FIGMA · CAPTION-SEMIBOLD

Open Sans 600 · 12.64px

9DX8-3QT5-7WY3

Inter · 600 · 12px / 15px.

captionRegularInter

1
USES

Inter Regular. Inter appears in the published set at SemiBold only; the Regular caption is Open Sans. This is the other half of the crossed pair.

FIND IT AT

www.safestays.com/agency/hotel-preferences

The secondary line on each result in the hotel lookup modal.

Agent or agent-manager login only — this is the variant's single call site, and admin accounts cannot open the page.

Prices include taxes and fees

IN CODE

Inter 400 · 12px

FIGMA · CAPTION/REGULAR

Open Sans 400 · 12.64px

Prices include taxes and fees

Inter · 400 · 12px / 15px · #49577A. Inter next to the Open Sans captions above — the family swap is visible.

Right style, wrong weight

6 variants · 120 uses

These map cleanly onto published styles by name and size, so they are not extra variants. But headingBase sets `fontWeight: 500` and every published Montserrat style is SemiBold. One line in the theme drives all six. Weight can be overridden per node by a Figma variable, so confirm against the real frames before changing it.

h3

52

USES

The widest single deviation in the file by call sites.

FIND IT AT

www.safestays.com/auth/login

The sign-in form heading. Mostly it is modal titles, though, across search, billing and the message log.

Where are you going?

IN CODE

Montserrat **500** · 25.63px

FIGMA · HEADING/03

Montserrat **600** · 25.63px

Where are you going?

Montserrat · 500 · 25.632px / 31.136px.

h4

47

USES

The file already has a correct h4SemiBold beside it, used 3 times.

FIND IT AT

www.safestays.com/

The Needs Attention panel heading on the home page. Also the title of every UiModal and UiPopup.

Guest details

Montserrat 500 · 32.43px	Montserrat 600 · 32.44px

All Stays

CAUGHT IN THE RUNNING APP

The page title on /stays. Live computed style: Montserrat · 500 · 32.432px / 39.408px. Figma publishes Heading/01 at SemiBold.

h2

Medium weight at the H2 step.

6
USES

FIND IT AT

www.safestays.com/

The Today's Overview section heading on the home page.

Trips and bookings

IN CODE

Montserrat **500** · 28.83px

FIGMA · HEADING/02

Montserrat **600** · 28.83px

Today's Overview

CAUGHT IN THE RUNNING APP

The Today's Overview section heading, home page. Live computed style: Montserrat · 500 · 28.832px / 35.024px. Figma publishes Heading/02 at SemiBold.

title

Title/Title also carries title case, which this variant does not apply.

1
USES

FIND IT AT

www.safestays.com/help-center

The Help Center page title. This is the variant's only use in the whole app.

Welcome back

IN CODE

Montserrat **500** · 36.80px

FIGMA · TITLE/TITLE

Montserrat **600** · 36.80px **title case**

Welcome back

Montserrat · 500 · 36.8px / 44.72px. No text transform, unlike welcomeTitle.

welcomeTitle

1
USES

Same weight gap as title, plus textTransform: capitalize — which is actually the closer match to Figma’s title case, making plain title the odd one out.

FIND IT AT

www.safestays.com/

The welcome banner across the top of the home page.

Welcome Back, Alex

IN CODE	FIGMA · TITLE/TITLE
Montserrat 500 capitalize · 36.80px	Montserrat 600 title case · 36.80px

Welcome Akash Plackal The (Demo Mode)

Admin ⓘ

CAUGHT IN THE RUNNING APP

The home page welcome heading. Live computed style: Montserrat · 500 · 36.8px / 44.72px · capitalize. The transform is doing visible work here — the underlying string is lower case, and Figma’s Title/Title asks for title case at SemiBold.

Published in Figma, missing from the theme

2 styles

The gap runs both ways. Neither of these has a UiText variant, so a designer asking for one today has nothing to hand a developer.

FIGMA STYLE	SPECIFICATION	NEAREST THING IN CODE
Subheading/01	Open Sans Regular · 18px	subheading tops out at 16px
Paragraph 01/Uppercase-Semibold	Open Sans SemiBold · 16px · uppercase	Uppercase exists at P2 only

Source of truth: Design System 2.0, *Safe Stays* — *Typography* page, 22 published text styles, plus the *Responsive Variables* token collection for sizes. Counts produced by scanning `src/**/*.{ts,tsx}` for `<UiText*>` tags with a `variant` prop, plus `getTextVariantCss()` calls; test files excluded. 1072 call sites across 73 declared variants.
